## Internet-Based Courses

An internet based course allows you to take courses from home by accessing a Northeast Texas Community College "virtual classroom." Course information, individual lessons, and class assignments are delivered from the distance education Internet server to your own personal computer. You will send class assignments and homework from your computer to your online instructor. Although you work on the course at your own location and weekly schedule, you can communicate with your instructor at any time of the day or night using e-mail. To become a student in an NTCC Internet based class, you must be accepted for admission to the College.

### Essential Computer Skills Needed for Success in an Online Course:

You must know how to use and have access to a web browser (like Firefox or Internet Explorer). You must be able to save a text file into various file formats. You must be able to type a document using a word processor program (faster than 20 words per minute is recommended). You must be able to attach a file to an e-mail message. Your online instructor may suggest other necessary skills.
