Additional guide tips:	
The two year schedule is to be utilized as a guide in selecting your semester course loads. Not all ag classes are offered every semester.	
Ag students should select ag courses first and then fill in with core classes to ensure they have the opportunity to take their preferred specialty courses when offered.	
Minimum 60 credit hours required = 42 Core and 18 Ag concentration credit hours.	
All first semester ag degree or certificate majors are required to meet with Ag faculty prior to 12th class day of their first semester for advisement.	
AGRI courses are guaranteed transfer courses and other elective type courses are transferred dependent on the university granting transfer.
