This syllabus serves as the documentation for all course policies and requirements, assignments, and instructor/student responsibilities.

Information relative to the delivery of the content contained in this syllabus is subject to change. Should that happen, the student will be notified.

Course Description: This is a standard first course in calculus. Topics include limits, continuity; definition of the derivative of a function and techniques of differentiation; applications of the derivative to maximizing or minimizing a function; the chain rule, mean value theorem, and rate of change problems; curve sketching; the Fundamental Theorem of Calculus; definite and indefinite integration of algebraic, trigonometric, and transcendental functions, with an application to calculation of areas. Four hours credit.

Prerequisite(s): MATH 2412 or equivalent with a grade of “C” or better

Student Learning Outcomes:

2413.1 Develop solutions for tangent and area problems using the concepts of limits, derivatives, and integrals.

2413.2 Draw graphs of algebraic and transcendental functions considering limits, continuity, and differentiability at a point.

2413.3 Determine whether a function is continuous and/or differentiable at a point using limits.

2413.4 Use differentiation rules to differentiate algebraic and transcendental functions.

2413.5 Identify appropriate calculus concepts and techniques to provide mathematical models of real-world situations and determine solutions to applied problems.

2413.6 Evaluate definite integrals using the Fundamental Theorem of Calculus.

2413.7 Articulate the relationship between derivatives and integrals using the Fundamental Theorem of Calculus.

Core Curriculum Purpose and Objectives:

Through the core curriculum, students will gain a foundation of knowledge of human cultures and the physical and natural world; develop principles of personal and social responsibility for living in a diverse world; and advance intellectual and practical skills that are essential for all learning.

Courses in the foundation area of mathematics focus on quantitative literacy in logic, patterns, and relationships. In addition, these courses involve the understanding of key mathematical concepts and the application of appropriate quantitative tools to everyday experience.

Program Student Learning Outcomes:

Critical Thinking Skills

CT.1 Students will demonstrate the ability to 1) analyze complex issues, 2) synthesize information, and 3) evaluate the logic, validity, and relevance of data.

Communication Skills

CS.1 Students will effectively develop, interpret and express ideas through written communication.

Empirical and Quantitative Skills

EQS.1 Students will manipulate numerical data or observable facts by organizing and converting relevant information into mathematical or empirical form

EQS.2 Students will analyze numerical data or observable facts by processing information with correct calculations, explicit notations, and appropriate technology.

EQS.3 Students will draw informed conclusions from numerical data or observable facts that are accurate, complete, and relevant to the investigation.

Evaluation/Grading Policy:

3 Major Exams	50%
Homework	10%
Quizzes	10%
4 Maple Assignments	10%
Comprehensive Final Exam	20%
TOTAL	100%

Grading System

"A"	90-100%
"B"	80-89%
"C"	70-79%
"D"	60-69%
"F"	< 60%

Graded assignments will be returned no later than three days following the assignment due date. For due dates, refer to the tentative class schedule below.

Required Instructional Materials:

Larson/Edwards, Calculus, 12th Edition, 2023
Loose-leaf textbook with WebAssign access code

Publisher: Brooks/Cole, Belmont, CA

ISBN Number - ISBN: 9780357950913 (Note: The NTCC Bookstore link is at www.ntcc.edu)

Optional Instructional Materials:

Change and Motion: Calculus Made Clear, 2nd Edition; Dr. Michael Starbird, The University of Texas at Austin (24, 30 min. lectures >> available through Mr. Miller or the WHS Library).

Minimum Technology Requirements: Computer with internet access and a graphing calculator. A graphing calculator is required (TI-84 plus CE is preferred, but other models may be approved by the instructor).

Required Computer Literacy Skills: A working knowledge of Microsoft Windows and/or Mac OS, as well as a familiarity with online learning platforms such as WebAssign.

- 1) Communicate via email;
- 2) Saving and reloading saved files;
- 3) Navigate Blackboard to access posted materials and WebAssign assignments.

Course Structure and Overview: There will be in-class lectures for each section. It is recommended that the student read and work through the examples in the section prior to the lecture. Notes for each lecture will be posted on Blackboard as well as Canvas.

Homework assignments will consist of online assignments in WebAssign. There are suggested problems from the textbook that should be used for study purposes.

There are 3 Exams, 4 Maple Projects (more information will be provided in class, each project should require no more than three hours outside of class), Quizzes will be given at the instructor's discretion (scheduling of quizzes will be based on overall student performance in class and homework assignments), the class will end with a Comprehensive Final Exam.

Communications: Questions can be directed to the instructor in class, during office hours, or via email (mike.miller@winnsboroisd.org or mmiller@ntcc.edu). Emails will be answered within 24 hours.

The college's official means of communication is via your campus email address. I will use your campus email and Blackboard to communicate with you outside of class. Make sure you keep your campus email cleaned out and below the limit so you can receive important messages.

Institutional/Course Policy: Regular and punctual attendance at all scheduled classes is expected. Attendance is necessary for successful completion of course work.

Due dates for the WebAssign assignments have been posted in WebAssign and students must keep up with these dates in an online setting.

Cell phones must be silenced and placed out of sight during class lectures.

No late work will be accepted. Make-up exams will not be given unless the arrangements have been made prior to the exam.

Alternate Operations During Campus Closure and/or Alternate Course Delivery Requirements

In the event of an emergency or announced campus closure due to a natural disaster or pandemic, it may be necessary for Northeast Texas Community College to move to altered operations. During this time, Northeast Texas Community College may opt to continue delivery of instruction through methods that include, but are not limited to, online through the Blackboard Learning Management System, online conferencing, email messaging, and/or an alternate schedule. It is the responsibility of the student to monitor NTCC's website (<http://www.ntcc.edu/>) for instructions about continuing courses remotely, Blackboard for each class for course-specific communication, and NTCC email for important general information.

Additionally, there may be instances where a course may not be able to be continued in the same delivery format as it originates (face-to-face, fully online, live remote, or hybrid). Should this be the case, every effort will be made to continue instruction in an alternative delivery format. Students will be informed of any changes of this nature through email messaging and/or the Blackboard course site.

NTCC Academic Honesty/Ethics Statement:

NTCC upholds the highest standards of academic integrity. The college expects all students to engage in their academic pursuits in an honest manner that is beyond reproach using their intellect and resources designated as allowable by the course instructor. Students are responsible for addressing questions about allowable resources with the course instructor. Academic dishonesty such as cheating, plagiarism, and collusion is unacceptable and may result in disciplinary action. This course will follow the NTCC Academic Honesty and Academic Ethics policies stated in the Student Handbook. Refer to the student handbook for more information on these subjects.

ADA Statement:

It is the policy of NTCC to provide reasonable accommodations for qualified individuals who are students with disabilities. This College will adhere to all applicable federal, state, and local laws, regulations, and guidelines with respect to providing reasonable accommodations as required to afford equal educational opportunity. It is the student's responsibility to request accommodations. An appointment can be made with the Academic Advisor/Coordinator of Special Populations located in Student Services and can be reached at 903-434-8264. For more information and to obtain a copy of the Request for Accommodations, please refer to the special populations page on the NTCC website.

Family Educational Rights and Privacy Act (FERPA):

The Family Educational Rights and Privacy Act (FERPA) is a federal law that protects the privacy of student education records. The law applies to all schools that receive funds under an applicable program of the U.S. Department of Education. FERPA gives parents certain rights with respect to their children's educational records. These rights transfer to the student when he or she attends a school beyond the high school level. Students to whom the rights have transferred are considered "eligible students." In essence, a parent has no legal right to obtain information concerning the child's college records without the written consent of the student. In compliance with FERPA, information classified as "directory information" may be released to the general public without the written consent of the student unless the student makes a request in writing. Directory information is defined as: the student's name, permanent address and/or local address, telephone listing, dates of attendance, most recent previous education institution attended, other information including major, field of study, degrees, awards received, and participation in officially recognized activities/sports.
