

# BIOL 2401.082 Anatomy and Physiology I - Online

## Course Syllabus: Spring 2021

*“Northeast Texas Community College exists to provide personal, dynamic learning experiences empowering students to succeed.”*

**Instructor: Dr. Kathy Eubanks**

**Office:** online

**Phone:** (903) 434-8292 (JoAnn Rodriguez - Secretarial Assistant to the Math/Science Faculty)

**Email:** keubanks@ntcc.edu

Office Hours	Monday	Tuesday	Wednesday	Thursday	Friday	Online
						Email anytime

***This syllabus serves as the documentation for all course policies and requirements, assignments, and instructor/student responsibilities.***

*Information relative to the delivery of the content contained in this syllabus is subject to change. Should that happen, the student will be notified.*

**Course Description:** Anatomy and Physiology is the first part of the two-course sequence. It is a study of the structure and function of the human body including cells, tissues and organs of the following systems: integumentary, skeletal, muscular, nervous, and special senses. Emphasis is on interrelationships among systems and regulation of physiological functions involved in maintaining homeostasis. The lab provides hands on learning experience for exploration of human system components and basic physiology. Animal dissection is a required component of laboratory activity. Successful completion of BIOL 2401 with a C or better grade allows the student to continue on to BIOL 2402.

**Prerequisite(s):** None

**Required Instructional Materials:**

**Required Textbook:**

**Inclusive Access:** We have negotiated with the Publisher to obtain a discounted price for your lecture course materials. Your eBook and **Connect Access Code** are included with your tuition and will be available through Blackboard on the first class day (use the link found on the Bb course homepage). The materials are required for your class and essential in your success. If you also determine that you would like a printed copy of your text in addition to your inclusive access loose-leaf copies will be available in the College Store at a discounted price. You may opt out of purchasing your materials from the College Store through the Census Date for the course. If you choose to opt out you will be responsible for purchasing your Connect Access Code from another vendor. You will receive a refund for the Inclusive Access if you opt out.

**Inclusive Access: Hole's Human Anatomy & Physiology With Connect Plus/Learnsmart Shier**  
McGraw Hill Copyright 19 Edition 15 ISBN 978-1-260-16523-4

**Required Lab Kit:**

A&P I Carolina Distance Learning Lab Kit # 581875

—OR—

A&P Carolina Distance Learning Dual Lab Kit # 581879 You may purchase this kit if you are confident you will be taking A&P II next semester. The dual kit is less expensive than purchasing both kits separately.

Please order your kit as soon as possible prior to the start of the semester so you will be prepared to begin the lab activities on time. If you live in close proximity to another student in the class, it is certainly permissible to share the cost of a lab kit and work in partnership with another student. See additional information under Evaluation/Grading Policy. Don't hesitate to communicate with me about this.

**Recommended Reading(s):** Chapters 1 through 12 in the textbook

**Minimum Technology Requirements:**

Laptop or computer with webcam with Chrome browser and Proctorio extension

Access to high speed daily internet

Microsoft Office 365 (available as a free download for all NTCC students)

Calculator. No programmable calculators or cell phones are allowed on exams.

**Required Computer Literacy Skills:**

Ability to use a web browser to access NTCC Blackboard System for course information, eBook and Connect assignments

Ability to access NTCC student email system and communicate professionally and competently with instructor

Ability to create and complete Word documents, save on your computer and upload into Bb assignment links

**Core Curriculum Purpose and Objectives:**

Through the core curriculum, students will gain a foundation of knowledge of human cultures and the physical and natural world; develop principles of personal and social responsibility for living in a diverse world; and advance intellectual and practical skills that are essential for all learning.

Courses in the foundation area of **life and physical sciences** focus on describing, explaining, and predicting natural phenomena using the scientific method. Courses involve the understanding of interactions among natural phenomena and the implications of scientific principles on the physical world and on human experiences.

**College Student Learning Outcomes:**Critical Thinking Skills

CT.1

Students will demonstrate the ability to 1) analyze complex issues, 2) synthesize information, and 3) evaluate the logic, validity, and relevance of data.

Communication Skills

CS.1

Students will effectively develop, interpret and express ideas through written communication.

## Empirical and Quantitative Skills

### EQS.1

Students will manipulate numerical data or observable facts by organizing and converting relevant information into mathematical or empirical form.

### EQS.2

Students will analyze numerical data or observable facts by processing information with correct calculations, explicit notations, and appropriate technology.

## Team Work

### TW.2

Students will work with others to support and accomplish a shared goal.

## **Course Student Learning Outcomes:**

1. Define anatomy and physiology, explain the importance of the relationship between structure and function and be able to describe and identify directional terms, anatomical positions, and anatomical structures.
2. Explain the nature of a human cell.
3. Describe the general make-up of a tissue and be able to recognize the primary tissue types and examples of each type.
4. Describe the general structure, function and interaction of the integumentary system.
5. Describe the general structure, function and interaction of the skeletal system inclusive of joints.
6. Summarize the major characteristics and functions of skeletal, smooth and cardiac muscle. Be able to identify the major superficial muscles of the human body.
7. Describe the general structure, function and interaction of the nervous system.
8. Work safely and collaboratively in the laboratory using appropriate equipment and tools to communicate results of scientific investigations, analyze data and formulate conclusions using critical thinking and scientific problem-solving skills.

*These represent the major learning outcomes for this course. You will see them referenced for all learning activities and assignments in Blackboard.*

## **Lectures & Discussions for ONLINE A&P:**

Week 1-	Introduction & Chapters 1 & 2
Week 2-	Chapters 3 & 4
Week 3-	<b>Unit 1 Assessment;</b> Chapter 5
Week 4-	Chapters 7 & 8; <b>Unit 2 Assessment</b>
Week 5-	<b>Midterm Exam &amp; Lab Practical 1;</b> Chapter 9
Week 6-	Chapter 6; <b>Unit 3 Assessment;</b> Chapter 10
Week 7-	Chapters 11 & 12
Week 8-	<b>Unit 4 Assessment; <u>Final Exam &amp; Lab Practical 2</u></b>

## Evaluation/Grading Policy:

Lecture Average 70% of final course grade

Lab Average 30% of final course grade

## Grading Scale

A = 100 – 90.0%

B = 89.9 – 80.0%

C = 79.9 – 70.0%

D = 69.9 – 60.0%

F = <59.9

The “lecture” component of this course will consist of online homework/quizzes through McGraw-Hill Connect and examinations with the following weight in calculating final lecture average:

### **10% Connect Online Assignments**

- LearnSmart assignments are beneficial to your understanding of the material.
  - **These are not figured into your course grade;** however, students have said that doing the LearnSmart exercises improved their grades.
  - This guided reading helps identify areas that you are having trouble understanding.
  - These should take an average of 35-50 minutes.
- Homework assignments are required and figured into the course grade.
  - These can be done 2 times before the due date. 5% will be deducted for the 2<sup>nd</sup> try.
  - There is no time limit so it is advisable to start early and work on this all during the week.
  - Use of the eBook and hints are available with no deductions.
  - Feedback will be shown after submitting each attempt. After the first attempt, you will see what questions you got correct or incorrect. After the 2<sup>nd</sup> attempt, a more detailed feedback is given.
  - Printing is allowed
  - Study attempts: After the due date, these homework assignments will be available for practice without changing your grade.
- Quizzes are required and figured into the course grade.
  - Usually 20 – 25 questions are pulled from a pool of questions. You may see new questions each time.
  - Quizzes have a time limit of 30 minutes.
  - Study attempts: After the due date, these will be available for practice without changing your grade.
  - **These are good to do multiple times after the due date to help review for the exams since you may see new questions each time.**
- What are **Study Attempts**? Study attempts allow students to retake and review the material, as well as get feedback, as many times as desired without the attempt affecting the grade. These are not available until after the due date. This is especially beneficial for quizzes because in many cases, a set number of questions are pulled from a larger pool of questions. New questions may be displayed each time the study attempt is taken. **However, this option prevents the ability to give an extension if the due date is missed.** If the due date is missed for any reason for a homework or quiz assignment, a zero will be given.
- For both Connect Homework and Connect Quizzes, **don't wait until the last day or two to complete the assignment.** If you have Connect problems, that will NOT be a reason to be late. It is your responsibility to contact Connect and get any problems resolved. However, before you get in touch with Connect, send me an email telling

me your problem. This way I can check to make sure that everything is set correctly on my end. Since it may take me 24 hours to get back with you, this is even more reason not to wait until the last minute.

- The two lowest assignment grades are dropped. The grade is continuously recalculated every time a grade is entered so that the grade you are seeing is current.

**20% Assessments 1-4** (5% each)

**20% Midterm Exam** (proctored)

**20% Final Exam** (proctored)

### **Assessments and Exams:**

There is a graded assessment for each of the four units that we are covering. The unit assessments are intended to prepare you for the midterm and final exams.

The midterm and final exams are proctored exams. These exams will be proctored through Proctorio, a browser-locking and remote-proctoring feature of McGraw-Hill's Connect. Failure to take these exams will result in a grade of "F" for the course.

The "Lab" component of this course will consist of hands-on laboratory activities through Carolina Biologicals Lab Kit for A&P I, as well as two lab practicals:

### **10% Lab Carolina Biologicals Hands-on Labs.**

- If you live in close proximity to another student you may certainly split the cost of the lab kit (you must do this on your own risk) and work together on the lab component of the course. Working in partnership with another student means that both learners should contribute to the laboratory atmosphere in learning from each other and yet, complete each lab report in your own words (**do not simply copy** from one another). Collaboration between student learners on the lab exercises can be beneficial if you work with each other to enhance the learning experience. Please be sure to report to your instructor any lab partner grouping that you develop. Each partner must be present during the completion of the lab activities and participate fully in the work. Each student must complete their own lab reports, take their own photos, and sign and submit them as described in the lab exercise instructions.
- Lab Reports are graded based on documented evidence of completion of the lab exercise (photos included in your lab report and your signature evident) and successful answering of questions presented. Short answer questions are expected to be answered in complete sentences in **your own words**.
- All assignments including lab reports need to be submitted on the due date by the time specified. Twenty-five points will be taken off the grade if submitted one day past the due date. There is no reason to submit a lab assignment past one date late. A zero will be given for any lab assignment that is received later with no exceptions. Labs will generally be graded within 1-2 weeks of submission.

- One lab assignment grade will be dropped. The grade is continuously recalculated every time a grade is entered so that the grade you are seeing is the grade with the lowest grades dropped.

#### **20% Online Lab Practicals (proctored)**

- Two lab practicals (10% each) will be given during the semester. See the schedule for the dates that the lab practicals will be available to take. These will consist of multiple choice and fill in the blank questions. Correct spelling is required. Approximately 0.5 points will be deducted for misspelled words.
  - Lab practical #1 will cover lab material from Chapters 1-5, 7 and 8: fetal pig dissection, anatomical terminology, cell structure and function, tissues, skeletal system and articulations.
  - Lab practical #2 will cover lab material from Chapters 9, 6, and 10-12: muscular system, integument, and nervous system, including general and special senses.

#### **Other Course Requirements:**

This is an online course in Anatomy and Physiology. Both lecture and laboratory study materials and assignments will be delivered through the Blackboard Learning Management System at NTCC. Students should ensure that they have the appropriate hardware, software, and technical skills for completing all assignments, labs and tests. Be sure to read the contents of the “START HERE” folder in Blackboard so that you fully understand all additional course requirements. If you have not taken a course in Blackboard at NTCC before, it is recommended that you review the basic Blackboard Skills of submitting assignments and sending messages. These tutorials can be found on the Student Resources tab under Blackboard Assistance as well as in the **Important technical requirements, information and support** folder found in “START HERE”.

Contact me with any questions you may have.

**Communication:** NTCC email is the official form of communication used in this course and by the college. I expect that you will regularly check your email and that you will email me using your NTCC email account. Announcements will also be emailed to you frequently. When you email me, I will respond in a timely manner, within 24 hours on weekdays and within 48 hours on weekends.

#### **Student Responsibilities/Expectations:**

Northeast Texas Community College is a “community of scholars.” Please remember that you and all students in this class are pursuing very important goals in your lives. As scholars, I expect every student to be courteous to other students, the teaching assistants, and the instructor in both lecture and laboratory experiences. It is expected that you will adhere to all college policies on academic honesty.

**Institutional/Course Policy:** The last day to drop with a “W” is **Tuesday, March 2<sup>nd</sup>**. It is the student’s responsibility to withdraw by that date if they are not able to complete the course.

#### **Alternate Operations During Campus Closure and/or Alternate Course Delivery Requirements**

In the event of an emergency or announced campus closure due to a natural disaster or pandemic, it may be necessary for Northeast Texas Community College to move to altered operations. During this time, Northeast Texas Community College may opt to continue delivery of instruction through methods that include, but are not limited to, online through the Blackboard Learning Management System, online conferencing, email messaging, and/or an alternate schedule. It is the responsibility of the student to monitor NTCC’s website (<http://www.ntcc.edu/>) for instructions about continuing courses remotely,

Blackboard for each class for course-specific communication, and NTCC email for important general information.

Additionally, there may be instances where a course may not be able to be continued in the same delivery format as it originates (face-to-face, fully online, live remote, or hybrid). Should this be the case, every effort will be made to continue instruction in an alternative delivery format. Students will be informed of any changes of this nature through email messaging and/or the Blackboard course site.

**NTCC Academic Honesty/Ethics Statement:**

NTCC upholds the highest standards of academic integrity. The college expects all students to engage in their academic pursuits in an honest manner that is beyond reproach using their intellect and resources designated as allowable by the course instructor. Students are responsible for addressing questions about allowable resources with the course instructor. Academic dishonesty such as cheating, plagiarism, and collusion is unacceptable and may result in disciplinary action. This course will follow the NTCC Academic Honesty and Academic Ethics policies stated in the Student Handbook. Refer to the student handbook for more information on these subjects.

**ADA Statement:**

It is the policy of NTCC to provide reasonable accommodations for qualified individuals who are students with disabilities. This College will adhere to all applicable federal, state, and local laws, regulations, and guidelines with respect to providing reasonable accommodations as required to afford equal educational opportunity. It is the student's responsibility to request accommodations. An appointment can be made with the Academic Advisor/Coordinator of Special Populations located in Student Services and can be reached at 903-434-8264. For more information and to obtain a copy of the Request for Accommodations, please refer to the special populations page on the NTCC website.

**Family Educational Rights and Privacy Act (FERPA):**

The Family Educational Rights and Privacy Act (FERPA) is a federal law that protects the privacy of student education records. The law applies to all schools that receive funds under an applicable program of the U.S. Department of Education. FERPA gives parents certain rights with respect to their children's educational records. These rights transfer to the student when he or she attends a school beyond the high school level. Students to whom the rights have transferred are considered "eligible students." In essence, a parent has no legal right to obtain information concerning the child's college records without the written consent of the student. In compliance with FERPA, information classified as "directory information" may be released to the general public without the written consent of the student unless the student makes a request in writing. Directory information is defined as: the student's name, permanent address and/or local address, telephone listing, dates of attendance, most recent previous education institution attended, other information including major, field of study, degrees, awards received, and participation in officially recognized activities/sports.
