

Transition Clinical LVN

Course Syllabus: RNSG 1162 Summer 2021

"Northeast Texas Community College exists to provide personal, dynamic learning experiences empowering students to succeed."

Chrystal Brown MSN, RN, FNP-C, APRN UHS Building Office #207 Office Phone # 903-434-8302

Email: cbrown@ntcc.edu

Tammy Cole MSN, RN UHS Building Office #205 Office Phone # 903-434-8371

Email: tcole@ntcc.edu

Office Hours	Monday	Tuesday	Wednesday	Thursday	Friday	Online/Email
Chrystal Brown					5:00-7:00pm	Any time
Tammy Cole	5:30-6:30 pm	5:30-6:30 pm	5:30-6:30 pm	5:30-6:30 pm		

This syllabus serves as the documentation for all course policies and requirements, assignments, and instructor/student responsibilities.

Catalog Course Description: A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional.

Lecture/Lab/Clinical: Four hours of lab each week

Pre-requisites: Admission to the Associate Degree Nursing Program

Co-requisites: RNSG 1128, RNSG 1324 and RNSG 1118

Student Learning Outcomes:

The Texas State Board of Nurses (BON) provides differentiated essential competencies (DECs) (2010) to guide nursing education programs in developing a curriculum which prepares graduates to provide

safe, competent, compassionate care. The competencies from the BON show the expected level of performance, integrating knowledge, skills, abilities, and judgment based upon the preparation in the program of study. The differentiation is based upon the level of the nursing education program which the student is enrolled.

The NTCC nursing program director and faculty incorporate the Differentiated Essential Competencies (DECs) (2010) into the student learning outcomes of each course, based on the level of the nursing educational program. The learning outcomes of this course are based on the essential competencies of graduates of Texas Associate Degree nursing education programs.

Course Objectives

Upon completion of this course the student will:

- 1. Apply knowledge of selected concepts to clinical situations.
- 2. Utilize clinical reasoning and knowledge based on the nursing program of study to date and evidence-based practice outcomes as the basis for decision making and safe patient-centered care by successful completion of assigned ATI Real Life Scenarios.
- 3. Utilize a systematic process to develop concept maps to provide patient-centered care to diverse patients across the life span (including teaching, referrals, etc.).
- 4. Implement measures to promote a safe environment for patients and others.
- 5. Demonstrate beginning collaboration and communication skills with diverse patients, families and the interdisciplinary team to plan, deliver and evaluate care.
- 6. Demonstrate beginning skills in using patient care technologies and information systems that support safe nursing practice.
- 7. Adhere to standards of practice within legal, ethical, and regulatory frameworks of the professional nurse.
- 8. Demonstrate attributes of the professional nurse.
- 9. Identify delegation of nursing interventions to appropriate personnel.

Exemplary Educational Objectives:

N/A

SCANS Skills:

Basic Skills: reading, writing, arithmetic and mathematical operations, listening, speaking.

Thinking Skills: creative thinking, decision making, problem solving, visualize, knowing how to learn, and reasoning.

Personal Qualities: responsibility, self-esteem, sociability, self-management, integrity and honesty.

Resources: time, money, materials and facilities, human resources.

Information: acquires, evaluates, organizes, maintains, interprets, and uses computers.

Interpersonal: participates in teams, teaches others, serves clients, exercises leadership, negotiates, works with diversity.

Systems: understands systems, monitors and corrects performance, improves or designs systems.

Technology: works with a variety of technologies.

Evaluation/Grading Policy:

A minimum overall grade of "C" is required in all Nursing courses before using that course as a prerequisite for the next course in sequence. In preparation for the State Board examination, the letter grade assigned to all Nursing courses shall be determined as follows:

$$A = 90 - 100$$

B = 80 - 89

C = 78 - 79

F = 77.9 and below

The average of all exam grades, including the final exam, before weighted calculation is performed, must be 78% or above to pass the course. Additionally, all class examinations are considered to be a major part of the course work upon which a major portion of your final grade will be based. If the total average of the module exams is below 78 percent the student will not qualify to sit for the final examination and will fail this course.

Grades will not be rounded when calculating the average (77.5 - 77.9) is not rounded to 78. Grades are not rounded at end of course. For example, a 79.9 will not be rounded to an 80. A minimum grade of 78% and a letter grade of "C" or higher is required to receive credit for the nursing course.

The grade earned in this course will be based on the following criteria:

Comprehensive Head to Toe Assessment	70%
Math Calculation Exam	Pass/Fail
NCLEX Tally	10%
ATI Real Life and other assignments	
	Total 100%

Dosage Math Exams:

Students should enter the Program with a basic knowledge of fractions, decimals, percentages, ratios and proportions. At the beginning of each Level of study, students are required to take a pharmacological math proficiency and medication administration test and successfully pass with a score of 100% prior to going to the clinical site. Related pharmacology information is included in the testing. If a weakness is noted regarding any of these topics, students are required to do remediation on those weak areas. General information about the math tests:

- Passing the test is a patient safety issue.
- Faculty design the tests with a level of difficulty similar in all tests so students would not see one test or one Course as "really" easy and another "really" hard.
- Questions having several parts to solve provide an exercise in critical thinking, which is a requirement of our program.
- Calculators (4-function, basic) may be used during testing and not the calculator on a cell phone.
- The number of opportunities to test prior to clinical for each Level of Course varies dependent on the length of the course, the time at which each Course begins clinical, and other variables determined by Faculty.
- Students may not rework just the "missed question(s), but will be required to take another pharmacological math proficiency and medication administration test.
- After the first unsuccessful test attempt, documentation of appropriate remediation is required prior to taking the next test.
- In order to be successful in taking the test, the student must achieve 100% on the exam prior to going to the hospital or other clinical setting. Passing the test with 100% accuracy is an essential clinical objective that must be accomplished to pass a clinical rotation.
- Principles of pharmacology/safe medication administration will be included (making problems similar to a clinical situation such as reading drug labels, or doctor's orders including an order, which may be incorrect.)
- Demonstration of math proficiency must be maintained during all clinical experiences.

Assignments/Assessments

The student course grade will be calculated using the following criteria:

The student is required to satisfactorily complete:

- 1. Comprehensive head to toe assessment in simulation lab or virtual with a score of at least 80 percent to pass the course or failure for the course (may repeat if below 80 the first time).
- 2. Document assigned patient assessment on electronic medical record in ATI
- 3. Complete assigned Real Life Simulations according to rubric grading criteria
- 4. Math Calculation Exam: Students are offered three opportunities to complete a test with 100% accuracy prior to going to clinical. Failure to achieve 100% proficiency will result in clinical failure and dismissal from all paired courses.

Exam Policies:

Exam blueprints are posted within Blackboard 72 hours prior to the administration of the exam. Posting of exam grades will be within 72 hours of exam completion to allow time for exam review and analysis by faculty. Students may be required to remediate concepts missed following an exam if the exam grade falls below 78. Students will not see exam questions again to protect exam security. Missed exams are made up at the discretion of the instructor and will be an alternate exam that may contain essay questions. Students should alert their instructor if they anticipate they will miss an exam.

Late work:

Late work is accepted with a deduction of 10 points per day for a maximum 3 days. After 3 days have passed, the grade is a zero. Students should have a backup plan for potential computer/printer problems and not wait until the last minute to complete assignments. If an assignment is produced, but is significantly past due, it will be evaluated, but will receive no credit points toward the final grade. However, all assignments must be completed (with or without points) to earn a passing grade in this course.

Required Textbook(s):

- ADN Nursing Faculty. (2021). Syllabus and Classroom Learning Folder. Northeast Texas Community College.
- American Psychological Association. (2009). *Publication Manual of the American Psychological Association* (Seventh ed.). American Psychological Association.
- Jarvis, C. (2019). *Physical Examination & Health Assessment* (8th ed.). Saint Louis, Missouri: Elsevier.
- Jarvis, C. (2019). *Physical Examination & Health Assessment Pocket Companion* (8th ed.). Saint Louis, Missouri: Elsevier.

Recommended Reading(s):

- NCSBN
- Texas Board of Nursing website
- Current Nursing Dictionary/Encyclopedia
- Texas Nurse Practice Act
- *Healthy People* 2021
- American Nurse Association Code of Ethics

Minimum Technology Requirements: Students are required to have access to a working laptop computer with a microphone, webcam, and at least 2 GB free space for use during class sessions and for online testing. Tablets and "Chromebook" computers are not compatible with testing platforms and are not recommended. Students are also required to have access to internet service and not rely on "hot spot" internet as this is also not compatible with testing platforms used.

Required Computer Literacy Skills: Students should be familiar with the Office Suite including Microsoft Word. Students should be familiar with how to upload documents, how to send and receive email, and navigate the internet.

Course Structure and Overview: Due to the COVID-19 pandemic, this course is delivered in the "online" format with required class attendance via Zoom or Microsoft Teams technology per classroom schedule for Summer 2020. This course covers selected health care as well as professional nursing concepts and exemplars.

Communications: NTCC email is the official method of communication between faculty and students in the nursing program. Students should check email at least once every day. Emails sent to course faculty can expect to be responded to within 24 hours Monday-Friday (Saturday for nights and weekend cohorts). Emails sent on the weekend will be answered the next business day. Faculty and students may communicate via Zoom or Microsoft Teams chat when that technology is in use or during official office hours. Course announcements should also be checked on Blackboard daily and any information posted, read thoroughly. At all times, communication should remain professional and respectful with faculty and between students. Refer to the nursing handbook for further communication policy and procedure.

Student Responsibilities/Expectations:

Students, when in class, are expected to be fully engaged in participation and learning. Cell phone usage is limited to class breaks. When in the Zoom or Microsoft Teams online class environment, cameras are to be "on" unless the instructor specifies to turn cameras "off". Class attendance is mandatory and absence from class can adverse consequences on successful progression within the program. A student who has missed a class, must make up class time. A student who misses 24 hours of class time will be placed on probation.

NTCC Academic Honesty/Ethics Statement:

NTCC upholds the highest standards of academic integrity. The college expects all students to engage in their academic pursuits in an honest manner that is beyond reproach using their intellect and resources designated as allowable by the course instructor. Students are responsible for addressing questions about allowable resources with the course instructor. Academic dishonesty such as cheating, plagiarism, and collusion is unacceptable and may result in disciplinary action. This course will follow the NTCC

Academic Honesty and Academic Ethics policies stated in the Student Handbook. Refer to the student handbook for more information on these subjects.

ADA Statement:

It is the policy of NTCC to provide reasonable accommodations for qualified individuals who are students with disabilities. This College will adhere to all applicable federal, state, and local laws, regulations, and guidelines with respect to providing reasonable accommodations as required to afford equal educational opportunity. It is the student's responsibility to request accommodations. An appointment can be made with the Academic Advisor/Coordinator of Special Populations located in Student Services and can be reached at 903-434-8264. For more information and to obtain a copy of the Request for Accommodations, please refer to the special populations page on the NTCC website.

Family Educational Rights and Privacy Act (FERPA):

The Family Educational Rights and Privacy Act (FERPA) is a federal law that protects the privacy of student education records. The law applies to all schools that receive funds under an applicable program of the U.S. Department of Education. FERPA gives parents certain rights with respect to their children's educational records. These rights transfer to the student when he or she attends a school beyond the high school level. Students to whom the rights have transferred are considered "eligible students." In essence, a parent has no legal right to obtain information concerning the child's college records without the written consent of the student. In compliance with FERPA, information classified as "directory information" may be released to the general public without the written consent of the student unless the student makes a request in writing. Directory information is defined as: the student's name, permanent address and/or local address, telephone listing, dates of attendance, most recent previous education institution attended, other information including major, field of study, degrees, awards received, and participation in officially recognized activities/sports.

Other Course Policies:

Students, when in class, are expected to be fully engaged in participation and learning. Cell phone usage is limited to class breaks. Class attendance is mandatory and absence from class can adverse consequences on successful progression within the program. A student, who has missed a class, must make up class time. A student who misses 24 hours of class time will be placed on probation. A student may not miss more than one clinical day during the semester or will fail clinical. Clinical includes simulation days. A makeup clinical assignment will be assigned. Students are expected to utilize the chain-of-command when a grievance occurs, first communicating with their course instructor. If a resolution is not found, the student would then progress to communication with the director of nursing. If a resolution is still not obtained, the Dean of Health Sciences would be the next appropriate step. The information contained in this syllabus is subject to change without notice. Students are expected to be aware of any additional course policies presented by the instructor during the course.

Cell Phone Policy

Cell phones/smart watches/tablets/computers are prohibited from all clinical sites. This means no student may bring them to a clinical site. Cell phones must remain in your vehicle or home. Cell phones/smart watches/tablets/computers cannot be in lab coats or other clinical materials and supplies. You can contact instructors by calling from a clinical site phone. Your instructors phone number is on the bottom of your clinical paperwork. Having a cell phones/smart watches/tablets/computer during clinical can result in dismissal from the program.

Volunteer Hours:

Nursing is a vocation grounded in service to others and to society. Nursing students are expected to "give back" to the community in the form of 4 volunteer hours over the course of the Spring semester with the focus on the geriatric population.

STUDENT ACKNOWLEDGEMENT FORM:

Please sign acknowledgement of all policies listed below and submit to Blackboard under student acknowledgement form by the due date.

- A. I acknowledge that I have received and understand the content of the course syllabus.
- B. I agree to communicate with course faculty through the Blackboard page/NTCC email established for the Nursing Course.
- C. I will abide by the Academic Integrity Policy as published in the Catalog.
- D. I agree to have my grades posted via Blackboard in a secure format.
- E. I acknowledge that I have read and understand the content of the current Northeast Texas Community College Nursing Department Student Handbook.
- F. Students will maintain confidentiality of client information and respect the client's right to privacy. It is illegal according to the provisions of the Health Information Portability and Accountability Act (HIPAA) of 1996 and unethical to reveal client identity or information without the client's permission. All students must have a signed Responsibility and Confidentiality Statement on file before beginning clinical. Written assignments will have no identifying client information which will compromise the right to patient confidentiality as stated in HIPAA legislation. Information will only be shared with nursing faculty. Discussions of client situations will be conducted in private or clinical conferences for the express purpose of student learning. NO DISCUSSIONS about any clients may take place in hallways, elevators, cafeterias, or outside the agency setting, including with your own family. Accessing confidential client information without the legal or ethical foundation for doing so may result in disciplinary actions. A breach of this policy may result in dismissal from the program and may result in the denial of readmission. A breach of this policy may also result in imprisonment and fines under HIPAA regulations.
- G. I will abide by the cell phone/electronic device policy as published in the Syllabus, Catalog and the Northeast Texas Community College Nursing Student Handbook.
- H. I have read and understand the Essential Functions and agree to notify the Nursing Department of any changes in my status.
- I. I understand that the catalog for Northeast Texas Community College is available online with all pertinent policies.
- J. I have read and agree with the exam/assignment review and question/grade challenge process.
- K. I have read and agree to abide by the Northeast Texas Community College Nursing Department Simulation Center Rules and Procedures.
- L. I have read and agree to comply with the clinical attendance and make-up policy. I understand this policy is effective for clinical/preceptor/clinical lab/ and simulation experiences.
- M. I have read and understand the ATI requirement and remediation policy for this course.
- N. I have read and understand the Student Success Plan as indicated in the syllabus.
- O. I have read and agree to abide by the Clinical Professional Debayions
- IA CPR and

P. I understand that all clinical requirements including	g required immunizations, current AH
background check must be completed before clearand	ce is granted to attend clinical.
