

Math 0404 991 – Foundations of Mathematical Reasoning ONLINE

Course Syllabus: Spring 2022

“Northeast Texas Community College exists to provide personal, dynamic learning experiences empowering students to succeed.”

Instructor: Lisa Ellermann

Office: Online Only

Phone: (903) 884-8929

Email: LELLERMANN@NTCC.EDU

Office Hours	Monday	Tuesday	Wednesday	Thursday	Friday	Online
	Online Only	Online Only	Online Only	Online Only	Online Only	8 am to 9 pm

This syllabus serves as the documentation for all course policies and requirements, assignments, and instructor/student responsibilities.

Information relative to the delivery of the content contained in this syllabus is subject to change. Should that happen, the student will be notified.

Course Description: MATH 0404 surveys a variety of mathematical topics needed to prepare students for a gateway college-level mathematics course. Topics include: numeracy with an emphasis on estimation and fluency with large numbers; evaluating expressions and formulas; rates, ratios, and proportions; percentages; solving equations; linear models; data interpretations including graphs and tables; verbal, algebraic and graphical representations of functions; exponential models. No college credit.

Prerequisite(s): TSI Incomplete Status with Multiple Measures Placement on TSI Placement Chart
Corequisite(s): 1) EDUC 1300 2) MATH 0200 if TSI Incomplete Status with Multiple Measures Placement as posted on TSI Placement Chart is required.

Student Learning Outcomes:

0404.1 Use appropriate symbolic notation and vocabulary to communicate, interpret, and explain mathematical concepts.

0404.2 Define, represent, and perform operations on real numbers, applying numeric reasoning to investigate and describe quantitative relationships and solve real world problems in a variety of contexts.

0404.3 Use algebraic reasoning to solve problems that require ratios, rates, percentages, and proportions in a variety of contexts using multiple representations.

0404.4 Apply algebraic reasoning to manipulate expressions and equations to solve real world problems.

0404.5 Use graphs, tables, and technology to analyze, interpret, and compare data sets.

0404.6 Construct and use mathematical models in verbal, algebraic, graphical, and tabular form to solve problems from a variety of contexts and to make predictions and decisions.

Program Student Learning Outcomes:

Critical Thinking Skills

CT.1 Students will demonstrate the ability to 1) analyze complex issues, 2) synthesize information, and 3) evaluate the logic, validity, and relevance of data.

Communication Skills

CS.1 Students will effectively develop, interpret and express ideas through written communication.

Empirical and Quantitative Skills

EQS.1 Students will manipulate numerical data or observable facts by organizing and converting relevant information into mathematical or empirical form

EQS.2 Students will analyze numerical data or observable facts by processing information with correct calculations, explicit notations, and appropriate technology.

EQS.3 Students will draw informed conclusions from numerical data or observable facts that are accurate, complete, and relevant to the investigation.

Evaluation/Grading Policy: The grade for this course will be based on the following:

1. Homework – Each practice assignment will be given a due date, though *it will remain open for one additional week after that due date*. Homework grades will include MyMathLab homework assignments. These will all average together to count for 25% of your final course grade. Note that homework is completed online through MyMathLab.

2. Participation – Participation in this online course is considered to be the on-time completion of posted assignments. For example, if there are 4 online assignments posted with a common due date and they are all completed by that date, you will receive 100 as a participation grade for that week. If 3 of the 4 online assignments are completed by the due date, you will receive 75 ($3/4 = 75\%$) as a participation grade for that week. The overall participation average will count as 10% of your final course grade. This is intended as an incentive to stay on schedule for completion of the course.

3. Exams will count as 40% of your final course grade. Three tests will be given this semester. Each student is required to take all unit tests. **Due dates for Unit tests within MyMathLab are non-negotiable.** No make up tests are allowed, however the Final Exam grade can replace a missing or low test grade.

4. Final Exam – The final exam will be a comprehensive exam and will count as 25% of your final course grade. A comprehensive final exam is mandatory for all students.

The percentage break-down is as follows:

Homework Assignments	25%
Participation	10%
Exams	40%
Comprehensive Final	25%

A = 90-100%, B = 80-89%, C = 70-79%, F = 69% or lower

Required Instructional Materials:

- 1) Access to MyMathLab (Inclusive Access)
- 2) Graphing calculator (TI-84, TI-84 Plus, or similar)
- 3) Writing materials – Pencils, eraser, highlighters

Publisher: Path to College Mathematics by Martin-Gay, Pearson (2017)

Optional Instructional Materials: *Path to College Mathematics* textbook, ISBN 0-13-465440-4

Minimum Technology Requirements: Graphing calculator (TI-84, TI-84 Plus, or approval by instructor)

Required Computer Literacy Skills: Basic computer skills to access online resources and information

Course Structure and Overview: This is a 16-week face-to-face course that meets parallel to the co-requisite course Learning Frameworks (EDUC 1300). A typical class involves general participation by all students in discussions and working problems that involve the analytical skills needed to apply the mathematical and statistical principles taught in MATH 0404. Students are required to complete online homework in addition to quizzes, and over the course of the semester, three exams and a final exam. It is very important students attend class and fully participate in the learning activities and assignments. A participation grade will be issued weekly, based on the percentage of *on-time submissions* for the week's assignments.

Communications: Emails will be responded to within 24 hours during the week and 48 hours on the weekend. The college's official means of communication is via your campus email address. Your instructors will use your campus email and Blackboard to communicate with you outside of class. Make sure you keep your campus email cleaned out and below the limit so you can receive important messages. For quicker response and to enable communication between students, this course utilizes the Remind app. An invitation will be sent to the mobile phone number submitted during registration. If this has changed, alternate signup information will be available in the "START HERE" folder.

Institutional/Course Policy: Late work (up to 1 week after due date) is accepted for this course, though the late submission of an assignment will impact the Participation grade for the week. All exams must be completed on time to achieve the desired goals of the course.

Alternate Operations During Campus Closure and/or Alternate Course Delivery Requirements

In the event of an emergency or announced campus closure due to a natural disaster or pandemic, it may be necessary for Northeast Texas Community College to move to altered operations. During this time, Northeast Texas Community College may opt to continue delivery of instruction through methods that include, but are not limited to, online through the Blackboard Learning Management System, online conferencing, email messaging, and/or an alternate schedule. It is the responsibility of the student to monitor NTCC's website (<http://www.ntcc.edu/>) for instructions about continuing courses remotely, Blackboard for each class for course-specific communication, and NTCC email for important general information.

Additionally, there may be instances where a course may not be able to be continued in the same delivery format as it originates (face-to-face, fully online, live remote, or hybrid). Should this be the case, every effort will be made to continue instruction in an alternative delivery format. Students will be informed of any changes of this nature through email messaging and/or the Blackboard course site.

NTCC Academic Honesty/Ethics Statement:

NTCC upholds the highest standards of academic integrity. The college expects all students to engage in their academic pursuits in an honest manner that is beyond reproach using their intellect and resources designated as allowable by the course instructor. Students are responsible for addressing questions about allowable resources with the course instructor. Academic dishonesty such as cheating, plagiarism, and collusion is unacceptable and may result in disciplinary action. This course will follow the NTCC Academic Honesty and Academic Ethics policies stated in the Student Handbook. Refer to the student handbook for more information on these subjects.

ADA Statement:

It is the policy of NTCC to provide reasonable accommodations for qualified individuals who are students with disabilities. This College will adhere to all applicable federal, state, and local laws, regulations, and guidelines with respect to providing reasonable accommodations as required to afford equal educational opportunity. It is the student's responsibility to request accommodations. An appointment can be made with the Academic Advisor/Coordinator of Special Populations located in Student Services and can be reached at 903-434-8264. For more information and to obtain a copy of the Request for Accommodations, please refer to the special populations page on the NTCC website.

Family Educational Rights and Privacy Act (FERPA):

The Family Educational Rights and Privacy Act (FERPA) is a federal law that protects the privacy of student education records. The law applies to all schools that receive funds under an applicable program of the U.S. Department of Education. FERPA gives parents certain rights with respect to their children's educational records. These rights transfer to the student when he or she attends a school beyond the high school level. Students to whom the rights have transferred are considered "eligible students." In essence, a parent has no legal right to obtain information concerning the child's college records without the written consent of the student. In compliance with FERPA, information classified as "directory information" may be released to the general public without the written consent of the student unless the student makes a request in writing. Directory information is defined as: the student's name, permanent address and/or local address, telephone listing, dates of attendance, most recent previous education institution attended, other information including major, field of study, degrees, awards received, and participation in officially recognized activities/sports.

Tentative Course Timeline (*note* instructor reserves the right to make adjustments to this timeline at any point in the term):

Course Schedule: (Subject to Change)

<u>Weeks</u>	<u>Topics</u>	<u>Assignments</u>	<u>Due Dates</u> (Due by 5:59 am Central Time)
Week 1: 1/18/2022	Introductions/Math Treasure Hunt	Math Treasure Hunt	1/25/2022
Week 2: 1/25/2022	Mathematical Symbols and Sets Variable Expressions and Equations	1.2/1.3	2/1/2022
Week 3: 2/1/2022	Operations on Real Numbers Square Roots	1.4	2/8/2022
Week 4: 2/8/2022	Introduction to Problem Solving Percents and Finance	2.4/2.5	2/15/2022
Week 5: 2/15/2022	Mathematical Symbols and Sets Variable Expressions and Equations Operations on Real Numbers Square Roots Introduction to Problem Solving Percents and Finance	Exam 1	2/22/2022
Week 6: 2/22/2022	Proportions Problem Solving	Appendix D	3/1/2022
Week 7: 3/1/2022	Graphing Linear Equations Determining and calculating intercepts and slope	3.1/3.2	3/8/2022
Week 8: 3/8/2022	All Exam 1 topics plus Proportions Problem Solving Graphing Linear Equations Determining and calculating intercepts and slope	Exam 2	3/22/2022 (after Spring Break)
Week 9: 3/22/2022	Writing Equations of Lines	3.3	3/29/2022
Week 10: 3/29/2022	Functions: Regression/Domain/Range	3.4	4/5/2022
Week 11: 4/5/2022	Negative Exponents Scientific Notation Reading and Creating Charts and Graphs	4.5/R.4	4/12/2022
Week 12: 4/12/2022	Counting Principle of Probability Introduction to Probability	7.1/7.4	4/19/2022
Week 13: 4/19/2022	All Exam 1 and 2 topics plus Writing Equations of Lines Functions: Regression/Domain/Range Negative Exponents Scientific Notation Reading and Creating Charts and Graphs Counting Principle of Probability Introduction to Probability	Exam 3	4/26/2022
Week 14: 4/26/2022	Measures of Central Tendency: Mean, Median, Mode ...	8.1	5/3/2022
Week 15: 5/3/2022		Review for Final Exam	5/11/2022 (midnight)
Week 16: 5/5/2022	All semester topics	Final Exam	5/12/2022 5:00 pm
