

General Physics II 1402.882 FE Online

Course Syllabus: Summer II 2022

“Northeast Texas Community College exists to provide personal, dynamic learning experiences empowering students to succeed.”

Instructor: Larry Russell

Office: Online

Phone: 903 434-8292

Email: lrussell@ntcc.edu

Office	Monday	Tuesday	Wednesday	Thursday	Friday	Online
Hours	10:00 – 11:00	10:00 – 11:00	10:00 – 11:00	10:00 – 11:00	10:00 – 11:00	
	6:30 – 8:30	6:30 – 8:30	6:30 – 8:30	6:30 – 8:30	6:30 – 8:30	

This syllabus serves as the documentation for all course policies and requirements, assignments, and instructor/student responsibilities.

Information relative to the delivery of the content contained in this syllabus is subject to change. Should that happen, the student will be notified.

Course Description: Fundamental principles of physics, using algebra and trigonometry; the principles and applications of electricity and magnetism, including circuits, electrostatics, electromagnetism, waves, sound, light, optics, and modern physics topics; with emphasis on problem solving.

Prerequisite(s): PHYS 1401

Student Learning Outcomes:

1402.1 Solve problems involving the inter-relationship of fundamentals charged particles, and electrical forces, fields, and currents.

1402.2 Apply Kirchhoff's Rules to analysis of circuits with potential sources, capacitance, inductance, and resistance, including parallel and series capacitance and resistance.

1402.3 Solve problems in the electrostatic interaction of point charges through the application of Coulomb's Law.

1402.4 Solve problems involving the effects of magnetic fields on moving charges or currents, and the relationship of magnetic fields to the currents that produce them.

1402.5 Use Faraday's and Lenz's laws to determine electromotive forces and solve problems involving electromagnetic induction.

1402.6 Articulate the principles of reflection, refraction, diffraction, interference, and superposition of waves.

1402.7 Describe the characteristics of light and the electromagnetic spectrum.

1402.L1 Demonstrate techniques to set up and perform experiments, collect data from those experiments,

and formulate conclusions from an experiment.

1402.L2 Demonstrate the collections, analysis, and reporting of data using the scientific method.

1402.L3 Record experimental work completely and accurately in laboratory notebooks, and communicate experimental results clearly in written results.

1402.L4 Solve practical problems involving optics, lenses, mirrors, and optical instruments.

Core Curriculum Purpose and Objectives:

Through the core curriculum, students will gain a foundation of knowledge of human cultures and the physical and natural world; develop principles of personal and social responsibility for living in a diverse world; and advance intellectual and practical skills that are essential for all learning.

Courses in the foundation area of mathematics focus on quantitative literacy in logic, patterns, and relationships. In addition, these courses involve the understanding of key mathematical concepts and the application of appropriate quantitative tools to everyday experience

Program Student Learning Outcomes:

Critical Thinking Skills

CT.1 Students will demonstrate the ability to 1) analyze complex issues, 2) synthesize information, and 3) evaluate the logic, validity, and relevance of data.

Communication Skills

CS.1 Students will effectively develop, interpret and express ideas through written communication.

Empirical and Quantitative Skills

EQS.1 Students will manipulate numerical data or observable facts by organizing and converting relevant information into mathematical or empirical form

EQS.2 Students will analyze numerical data or observable facts by processing information with correct calculations, explicit notations, and appropriate technology.

EQS.3 Students will draw informed conclusions from numerical data or observable facts that are accurate, complete, and relevant to the investigation.

Teamwork

TW.2 Students will work with others to support and accomplish a shared goal.

Evaluation/Grading Policy:

Homework and laboratory work will represent 25% of your grade (15% Homework / 10% Lab). The homework assignments are completed in Webassign. Webassign is accessed from Blackboard from the "Access Webassign" tab in the menu on the left side of the Blackboard screen. Homework problems can be reworked up to twenty times. The last grade earned for each homework assignment will be posted for the final grade.

The Lab Procedures are available in Blackboard in the menu on the left side of the screen. Blank Lab Reports are included in the procedures in Word form containing data tables and pre-/post-lab questions. Edit these blank forms and submit the completed form for grading to the submission tabs in the Lab Exercises folder. You may use graph paper or a graphing utility to produce any graphs required for the lab reports. These may be submitted as pictures or image files. Please do not free hand graphs. A lab kit is necessary for completing the lab procedures and is available through the book store. There is a lead time on receiving your lab kit, and since students receive their lab kits at different times, there are no due dates on the labs other than completion by the due date of the final exam.

There will be 3 Unit Exams and a comprehensive Final Exam. The average of the exams will represent 75% of your grade. Exams #2, 3, and the Final Exam will utilize the Webassign Lockdown browser during administration. The introductory assignment requires the use of the Lockdown Browser, so you may iron out any issues before taking an exam. Online exams are each available on Webassign at scheduled times and will become available according to the course schedule. The final exam covers all of the course material. Only one attempt is allowed for each online exam, however two attempts may be submitted for each question with points deducted for multiple attempts. Exams must be completed during the testing window.

The letter grading system is: A (90-100%), B (80-89%), C (70-79%), D (60-69%), F (0-59%). There are no make-up assignments. Course averages will be updated in Blackboard after each exam. The gradebook in Blackboard is the official gradebook since it includes the lab assignments.

Required Instructional Materials: This course will utilize Webassign online resources for homework and exams. Access to the assignments and the electronic copy of the textbook Serway and Vuille, *College Physics*, Tenth Edition, Cengage Learning, Stamford, CT, 2015 is provided by access to Webassign on the internet.

Publisher: Cengage Learning

ISBN Number: 978-1-285-73702-7

Optional Instructional Materials: A hardback copy of the textbook may be obtained from the NTCC bookstore.

Minimum Technology Requirements: Ability to access the internet.

Required Computer Literacy Skills: Ability to navigate the internet.

Course Structure and Overview:

Chapter 15 Electric Forces and Electric Fields

Chapter 16 Electric Energy and Capacitance

Exam #1

Chapter 17 Current and Resistance

Chapter 18 Direct-Current Circuits

Exam #2

Chapter 19 Magnetism

Chapter 20 Induced Voltages and Induction

Chapter 21 Alternating-Current Circuits and Electromagnetic Waves

Exam #3

Chapter 22 Reflection and Refraction of Light

Chapter 23 Mirrors and Lenses

Final Exam

Communications: The college's official means of communication is via your campus email address. I will use your campus email address and Webassign announcements to communicate with you outside of class. Make sure you keep your campus email cleaned out and below the limit so you can receive important messages.

Alternate Operations During Campus Closure and/or Alternate Course Delivery Requirements

In the event of an emergency or announced campus closure due to a natural disaster or pandemic, it may be necessary for Northeast Texas Community College to move to altered operations. During this time, Northeast Texas Community College may opt to continue delivery of instruction through methods that include, but are not limited to, online through the Blackboard Learning Management System, online conferencing, email messaging, and/or an alternate schedule. It is the responsibility of the student to monitor NTCC's website (<http://www.ntcc.edu/>) for instructions about continuing courses remotely, Blackboard for each class for course-specific communication, and NTCC email for important general information.

Additionally, there may be instances where a course may not be able to be continued in the same delivery format as it originates (face-to-face, fully online, live remote, or hybrid). Should this be the case, every effort will be made to continue instruction in an alternative delivery format. Students will be informed of any changes of this nature through email messaging and/or the Blackboard course site.

NTCC Academic Honesty/Ethics Statement:

NTCC upholds the highest standards of academic integrity. The college expects all students to engage in their academic pursuits in an honest manner that is beyond reproach using their intellect and resources designated as allowable by the course instructor. Students are responsible for addressing questions about allowable resources with the course instructor. Academic dishonesty such as cheating, plagiarism, and collusion is unacceptable and may result in disciplinary action. This course will follow the NTCC Academic Honesty and Academic Ethics policies stated in the Student Handbook. Refer to the student handbook for more information on these subjects.

ADA Statement:

It is the policy of NTCC to provide reasonable accommodations for qualified individuals who are students with disabilities. This College will adhere to all applicable federal, state, and local laws, regulations, and guidelines with respect to providing reasonable accommodations as required to afford equal educational opportunity. It is the student's responsibility to request accommodations. An appointment can be made with the Academic Advisor/Coordinator of Special Populations located in Student Services and can be reached at 903-434-8264. For more information and to obtain a copy of the Request for Accommodations, please refer to the special populations page on the NTCC website.

Family Educational Rights and Privacy Act (FERPA):

The Family Educational Rights and Privacy Act (FERPA) is a federal law that protects the privacy of student education records. The law applies to all schools that receive funds under an applicable program of the U.S. Department of Education. FERPA gives parents certain rights with respect to their children's educational records. These rights transfer to the student when he or she attends a school beyond the high school level. Students to whom the rights have transferred are considered "eligible students." In essence, a parent has no legal right to obtain information concerning the child's college records without the written consent of the student. In compliance with FERPA, information classified as "directory information" may be released to the general public without the written consent of the student unless the student makes a request in writing. Directory information is defined as: the student's name, permanent address and/or local address, telephone listing, dates of attendance, most recent previous education institution attended, other information including major, field of study, degrees, awards received, and participation in officially recognized activities/sports.

Tentative Course Timeline (*note* instructor reserves the right to make adjustments to this timeline at any point in the term):

Chap.	Title	Week	Key Due Dates*
15	Electric Forces and Electric Fields	1 - 2	7/14/22
16	Electric Energy and Capacitance	1 - 2	7/18/22
	Exam #1		7/19/22
17	Current and Resistance	2 - 3	7/25/22
18	Direct Current Circuits	2 - 3	7/25/22
	Exam #2		7/26/22
19	Magnetism	3	7/29/22
20	Induced Voltages and Inductance	3 - 4	8/1/22
21	AC Circuits and Electromagnetic Waves	4	8/3/22
	Exam #3		8/5/22
22	Reflection and Refraction of Light	4 - 5	8/8/22
23	Mirrors and Lenses	4 - 5	8/10/22
	Final Exam / Labs Due		8/11/22

**This calendar will be adjusted to the needs of the course. Changes will be based on the course progress. The exam dates could be moved one or two days up or down. The Final Exam date is fixed and will not change.*
